The Things Done Report displays a record of additions, modifications, and deletions of records in CDS.

To run the Things Done Report:
- From the main screen in CDS, select Reports in the main menu and then select Things Done Report.
- Select report options in the Things Done Report Options window.

After selecting options for the Things Done Report, click OK to run the report.

Reading the Things Done Report:
The Things Done Report can be customized to display information including date and time of record modification, table name of the modified record, and detailed information on the modification. To customize the layout of the report, use the Customize Layout button on the Things Done Report toolbar.
- Establish a specific date range for the report by using the From and Thru buttons in the Date Range section. Select a pre-defined date range in the Special Date Ranges section.
- The Things Done Report is a user based report and can be run for only one user at a time. Select a user to run a Things Done Report for by selecting a user with the User Name drop-down.
To modify the type of information tracked on the Things Done Report:

- Open a user profile by clicking on the Database menu in the main screen of CDS and selecting **Modify Current User Profile**.
- With the User Profile open, select the **Things Done** tab.
- Make adjustments to the kind of information captured in the Things Done Report by selecting and/or deselecting options on the **Things Done** tab.
- Administrators can limit a users ability to view the Things Done Report and make adjustments on the **Things Done** tab.

To activate or deactivate a user’s ability to view the Things Done Report and the Things tab:

- Open the User Profile for the desired user.
- Select the **Security Information** tab.
- Make the desired selection by selecting/deselecting the **Read Things Done** option in the **Data Security Options** section of the **Security Information** tab.

To delete old entries in the Things Done Report and reduce the size of your database:

- Run a Things Done Report for a specific date range when entries in the Things Done Report are no longer relevant.
- Verify that the records in the report are no longer needed.
- If none of the records are needed, click the **Tag All** button in the Things Done Report toolbar. If only selected records are needed, individually tag the unnecessary records.
- Click the **Delete** button on the Things Done Report toolbar.
- For a thorough cleaning of Things Done Report entries, run a Things Done Report for each user and delete all unneeded entries.
- After deleting unneeded entries in the Things Done Report, it is a good idea to perform a database rebuild.
